

The races for the GC 32 class will take place in the Alfa Area (please consult the attached diagram). This area will be allocated in front of Portixol.

To watch racing on the water, we have to inform you that this area is protected by an exclusion zone with surrounded by black color buoys, as shown on the following diagram. This area can only be approached by authorized organization boats to ensure a good quality racing and preserve the participants and the spectators' safety.

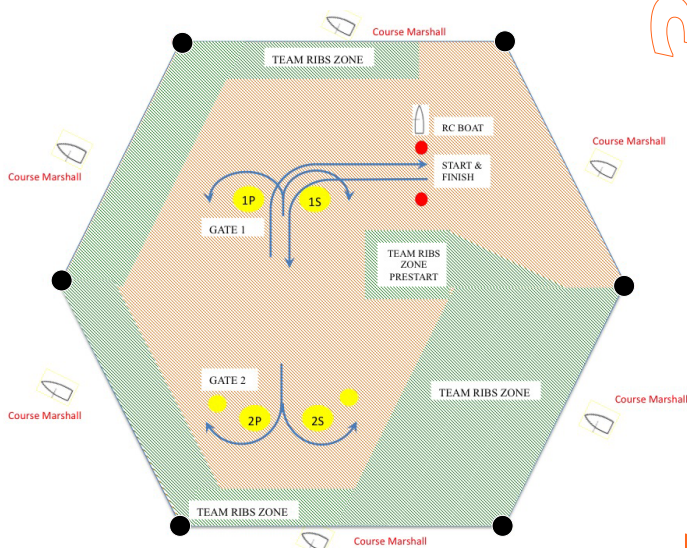

The GC32 catamarans are very fast boats and sail very quickly around their courses, therefore the reaction period is substantially reduced, increasing the amount of dangerous moments and even accidents.

RACE AREAS

This is why the organization emphasizes you to respect these advices and to respect the indications that you may receive from the responsible of the exclusion zone (Course Marshalls.) In case of any kind of doubt you may contact these Marshalls on VHF channel 71. The Course Marshall boats will be identified with an R international code flag and GC 32 flag.

GC 32 RESTRICTED RACE COURSE AREA

It is important you to know the courses will be set depending on the intensity and direction of the wind for each race, therefore the mark laying and the exclusion area may vary depending on the final course chosen for the race.
